GAN RUI EN

Software Engineering Student | Full Stack Developer

Johor, Malaysia | ganruien1177@gmail.com | LinkedIn | github.com/Gan0117

ABOUT ME

Year 3 Software Engineering student at Universiti Teknologi Malaysia and full stack developer with software development skills, seeking a software engineering internship. Averis x Monash Hackathon 2026 Champion with leadership experience as team leader in UTMHackathon 2026 and DIGITEX 2026. Loves building solutions that make the world better, and aspires to become an experienced software engineer who leads a team building products with a global impact.

EDUCATION

Universiti Teknologi Malaysia (UTM), Skudai *Year 3*

Bachelor of Software Engineering

ACHIEVEMENTS

Champion · Averis x Monash Hackathon 2026

Silver List · DIGITEX (Team Leader) 2026

Top 10 Finalist · UTMHackathon (Team Leader) 2026

Top 5 Finalist · Nexus Hackathon 2026

COMPETITION PROJECTS

HolyShip | Champion, Averis x Monash Hackathon 2026 *Team Member*

Python · Vite · TypeScript

- Contributed to an end-to-end shipping document verification platform that turns incoming email into a trusted SI–BL verification workflow.
- Workflow connects Outlook, a shared backend, a web dashboard, and auditable human review.

EcoPal | Silver List, DIGITEX 2026 · Top 10 Finalist, UTMHackathon 2026 *Team Leader*

Dart · Flutter · FastAPI

- Led the team in building a gamified personal finance app that turns financial habits into a living, breathing garden.
- Built on the belief that seeing the consequences of spending in something people care about encourages lasting, healthy financial behaviours.
- Presented the project at a DIGITEX booth, pitching one-on-one to visitors and judges.

ReRoute | CodeNection 2026 *Team Member*

TypeScript · Supabase · Expo

- Developed a shared group-trip space that plans trips with AI, mediates group decisions, adapts in real time when plans break, splits the bill, and keeps a memory of the trip afterwards.

TRSE-SME-Tax-Intelligence | UMHackathon 2026 *Team Member*

Dart · C++ · Supabase

- Contributed to an AI-powered financial compliance dashboard built specifically for the Malaysian market.

LEADERSHIP & COMMUNITY

Club Member & Internship Mentor | Airost, UTM *Nov 2025 – Present*

- Built Auto-Visualizer for DF company: a full-stack web app, with AI integration and machine learning, that detects issues in time-based graphs and summarises them into plain-language labels and reports.
- Developed the internal Airost system for members to organise projects and documentation.
- Mentored Airost Internship 2026 interns by reviewing their projects and giving suggestions.

TECHNICAL SKILLS
